Development of an intelligent studying platform
(Frontend - Javascript - Angular5 - Ionic)

Do you want to revolutionize the way students learn? Are you interested in an IDP, where the results of your work are directly applied to a real product? Do you have skills and programming experience in Web-development / Angular / JavaScript / Ionic? Then join us and apply for an IDP with StudySmarter!

WHO WE ARE:

StudySmarter is a Munich based start-up with the goal to develop an intelligent, digital studying platform, which supports university students during their studying process. By using technologies like Natural Language Processing and Machine Learning, the software generates studying content like summaries, mind-maps and flashcards automatically, to make the studying process smarter and more efficient for the students. Moreover, motivation and structure are improved by using gamification and statistics features and covering the entire learning experience in one platform.

In January, we launched our platform (www.studysmarter.de) and already acquired > 6000 users in the first months, but this is only the start! All of us are students ourselves, which means we are highly motivated to revolutionize the learning process and we hope you are too!
WHAT YOU CAN WORK ON:

- Improvement and extension of an Angular-based PDF-Viewer (e.g. improving performance, additional interaction features for the student)
- Implementation of the frontend component for an intelligent study assistant, which supports the student in his learning process
- Improvement of UX and Design
- Work on new features for our mobile app (developed with Angular + Ionic)
- Ideation and implementation of your own ideas: How can studying become as easy and intuitive as possible for a student
- Much more (depending on your skills/interests)

WHY YOU SHOULD APPLY:

- In this project, you will learn a lot, not only regarding Software Development, but also gain insights about a startup in an extremely exciting phase!
- You will be a part of the team, just like us, and have the opportunity to be creative and contribute your own ideas!
- Your work is guaranteed to end up in an actual product - not in a cupboard!
- You work on something that matters to you: revolutionizing the way students learn!
- We have a nice office near Odeonsplatz with coffee, snacks, table tennis, an office dog and a desk for you, but remote tasks are also possible!

WHAT YOU NEED TO KNOW BEFORE YOU START:

- Lectures that you can take during the IDP: “Global Entrepreneurship”, “Technology and Innovation Management”, “Entrepreneurship”, “Strategy & Organization” (but you can make suggestions as well)
- Start date: asap, but flexible
- Team applications possible
- If you have further questions, shoot us a mail: Till@studysmarter.de

Sounds interesting? Please shoot us a mail to: Till@studysmarter.de
If you are up for a challenge, we are happy to welcome you on board!
