

- Quirin Scheitle
- PhD candidate at Chair of Network Architectures and Services

- Internet Measurements, both large-scale active and passive
- Applied to Security (HTTPS Ecosystem, TLS) . . .
- . . . and Architectural/Structural Questions (IPv6, APNs Backend, MMS Backends, IPv6/IPv4)
- Trying to further the Internet Measurement field through ready-to-use artifact sharing (replicability) and precise measurement descriptions (reproducibility)

- v6-v4 Internet Mapping
 - How interdependent are the IPv6 and the IPv4 Internet topologies at router-level?
- Building a *resource-minimal* IP address geolocator on top of Ripe Atlas
 - Can we provide an easy-to-use service that locates Internet routers using public measurement frameworks?
