

- M.CSE. Vittorio Cozzolino
  - PhD student, Chair of Connected Mobility (TUM)
  
  - Core Research Interests:
    - *Internet of Things (IoT) and Smart Cities*
    - *Edge Computing*
    - *Computation Offloading*
    - *Light Weight Virtualization (LWT)*
  
  - Additional Research Interests:
    - *Augmented/Mixed Reality*
    - *Security for IoT*
-

# Open Questions

1. In what aspect IoT technologies will reshape our future?
2. Do we have a gap between Cloud and IoT? Do we need something in between?
3. How the miniaturization process (nanosensors networks) will change the pervasiveness of IoT devices?
4. What are the risks of a fully connected world?
