

Jörg Ott

- TUM, CS, Chair of Connected Mobility

Some current interests

- Internet transport protocols and QUIC
- Cloudless networking and “Distributed Internet”
- Secure in-network computing (not just) for mobile users
 - Application (de)composition and distribution
 - Exploring different languages and flavors of “virtualization”
 - Case study: Internet of Things
- Network architectures for non-Internet environments

General motivation

- Collaboration in systems research at TUM CS+EI
- Reaching out

Questions

- Privacy?!
