The growing internet trade of recent years has led to more and more counterfeit products being offered and manufacturers losing contact with their customers. With IMERO, manufacturers can give their products a unique identity that allows them to communicate directly with their customers and provide them with a bundle of digital assets that add a digital dimension to the product.

**Your Tasks**

Every fast growing start-up needs a scalable architecture. Your task is to setup a secure and scalable Kubernetes Cluster for our webservices.

- Get familiar with K8s
- Design a scalable architecture
- Setup a locale K8s cluster including a dashboard
- Make our services container-ready
- Deploy it to the cloud
- Documentation of your work

You will work directly with the founders, be involved in all important decision-making processes and be able to be present during the important first steps.

**Why IMERO**

IMERO is still at the very beginning of its journey, but has enormous growth potential. You now have the opportunity to jump on board! Develop your own ideas and concepts and put them into practice. Get involved and see how a whole new company takes shape through your work.

Have become curious? Send us your CV and your previous projects, experiences etc. If you have any questions, do not hesitate to contact us by mail or phone.

We also want to grow strongly, so that after your graduation you might be interested in joining us.

**Your Profile**

- You study computer science
- Knowledge of current web technologies
- Interested in new technologies
- You work proactively and independently
- Good knowledge of German and English
