Work creatively, agile and iteratively on an individual project in an interdisciplinary team for one semester.

Anyhing is possible, as long as it is new, it is true, and it matters.

You will work together with designers, architects or human factors specialists and learn tangible methods for project management as well as for idea generation, prototypical implementation and human-centered evaluation.

ASSIGNMENT
We assign you to interdisciplinary teams (~ 5 students per group). We provide the entire course with a leitmotif.

KICK-OFF
Three-day sprint to get familiar with the process, instructed by your coaches.

TEAMWORK
Elaboration of your team topic for 14 weeks in an iterative, agile and creative way, supported by tutors.

Learn and apply new tools and methods for idea generation, prototypical implementation and human-centered evaluation.

Improve your soft skills in communication, collaboration, interdisciplinary teamwork and conflict management.

HOME STRETCH
Present and document your project work, results and experience with regard to the leitmotif.
