We're looking for a Vue.js developer supporting us in building the go-to app for procurement and sales professionals in the pharmaceutical and chemical industries. Contribute to a solution that matters to everyone by making the global drug and chemical supply more transparent, efficient and reliable.

We are a Munich-based tech startup bringing Big Data to the pharmaceutical and chemical markets. Our mission is to take away the pain of manual data processing and make relevant information easily accessible for business professionals. Our clients frequently emphasize how much easier and effective their work has become thanks to the up2date, highly granular and actionable information provided on our platform.

Being part of a fast-growing startup gives you endless opportunities to grow and take ownership. We’ll make sure you have everything you need to do your best work and make the biggest impact possible at QYOBO.

What you’ll bring
• Experience with JavaScript; libraries/frameworks like Vue, React or Angular (TypeScript is a plus)
• Experience with HTML, CSS
• Excellent communication skills, a team player with a ‘winning as a team’ attitude
• Self-motivated and taking pride in your work results

What you’ll do/learn
• Write scalable and maintainable web components in Vue.js, Vuetify and SCSS
• Build new UI patterns while also refactoring older ones
• Champion good habits (development techniques, security, test driven development)
• Perform thorough code reviews and troubleshoot complex issues
• See your code go live

We offer you
• Ownership and responsibility for features and projects
• A steep learning curve driving your personal growth
• An inclusive, non-hierarchical team with experienced and open-minded colleagues – we are at least five nationalities (six if you count Bavarian)
• A fun work environment and team events on a regular basis
• A beautiful office in the heart of Munich (WERK1)
• The possibility to join our team after the IDP (working student or full time)

Munich
IDP – Frontend Developer
(m/f/d)
