

IDP (3-6 months) Front-End Development of SaaS Solution

WE ARE FIGHTING FOOD WASTE

Mitakus analytics is developing a **SaaS that helps chefs** & owners of canteens, restaurants and other gastronomy businesses with actionable analytics and insights. Our mission is to help gastronomes **reduce food waste** and become more profitable and sustainable, by providing precise **demand predictions and menu recommendations**.

YOUR RESPONSIBILITIES

- Create together with customers and our team a concept for the **new analytics dashboard**
- Implement new features ranging from a simple login to individual statistics
- Develop and implement **frontend onboarding experience** for the user
- If you find promising challenges on our journey we are very open to include them into your tasks

YOUR PROFILE

- Development experience in at least one of the following: **JavaScript, React.js, Angular, Vue.js**
- First experience in working with **AWS** is a plus!
- Excellent communication and organisational skills
- Motivated and hands-on mentality
- Strong communication skills in English

WHY JOIN US?

- Work on a topic that matters! Contribute to help gastronomes be more efficient and help reduce food waste in gastronomy and the supply-chain
- **Innovative technologies** on a modern tech stack (AWS, React, ...)
- Become part of an **inclusive, non-hierarchical team**
- Work alongside like-minded people and benefit from extensive coaching
- **Flexible working hours** and conditions tailored to **your possibilities**

The project will be supervised by the TUM Entrepreneurship Research Institute, Professorship "Entrepreneurial Behavior", Prof. Breugst. Besides the project work, you will take lectures like: "Entrepreneurship" and "Technology and Innovation Management: Introduction"
